ABOUT HURGHADA

Hurghada was founded in the early 20th century, and until a few years ago, remained a small fishing village. But today, it has gone on to become the foremost tourist resort of the Red Sea coast and an international center for aquatic sports. If it takes place in or on the water you can do it here: windsurfing, sailing, deep-sea fishing, swimming, but, above all, snorkeling and diving. The unique underwater gardens offshore are some of the finest in the world, justifiably famous amongst divers. The warm waters here are ideal for many varieties of rare fish and coral reefs, which may also be observed through glass bottom boats. This area has many fine accommodations, usually offering warm and efficient service. Restaurants are mostly along the main road. While in Hurghada, don't miss the museum and aquarium, with their complete collections of flora and fauna of the Red Sea.

THE CONFERENCE

The objective of the 3rd international conference on nanotechnology and its applications (ICNA-III-2015) will be to provide a major interdisciplinary forum for presenting new approaches from various areas of nanotechnology. It is also intended to benefit from this event to bring scientific research in the field into its applications, to facilitate technology transfer and to create ideas between participants.

PRESENTATION TOPICS

The conference program will address a variety of disciplines including:

- Nanotechnologies and innovative materials
- Nanotechnologies and health
- Nanotechnologies and water
- Nanotechnologies and economic challenges
- Nanotechnologies and sustainable development
- Nanotechnologies and renewable energy
- Miscellaneous

IMPORTANT DATES

Abstracts submission deadline:

20 December 2015

Acceptance Notification:

10 January 2016

Final submission:

15 February 2016

ABSTRACTS

Format :
