Objectives of the Conference:

- This is the 12th in a series of Desert Technology conferences since 1991. These conferences focus on desertification issues & multidisciplinary solutions such as:
 - Special characteristics and benefits of desert ecosystems
 - Mechanism of desertification and its management
 - Appropriate technologies for developed and developing regions

The conferences provide opportunities for researchers to learn & exchange knowledge through technical presentations, participation in productive working groups, and in informal discussions. The issues of desertification are a global concern, requiring continued & expanding research to mitigate the consequences. Building upon previous experiences & accomplishments, DT 12 offers an opportunity to participate in discussions & the presentation of research projects (including natural, technological & human sciences) aimed at overcoming constraints of desertification. The conference welcomes researchers and educators associated with deserts & arid regions from diverse areas of arid zone science.

Potential Conference Topics & Schedule

- DT 12 welcomes any topics related to technologies in arid zones of the world such as:
- ❖ Desert energy
 - ❖ Dry land agricultural farming systems (including stress biology)
 - ❖ Drought mitigation

- ❖ Drug discovery from desert flora
- ❖ Emerging carbon markets
- ❖ Eco-friendly materials and their application
- ❖ Global climate change
- ❖ Halophytes
- ❖ Human/social sciences related to deserts
- ❖ Protection and utilization of biodiversity
- ❖ Salinity management
- ❖ Soil and water technologies combating desertification
